

Ionic Gel – Rapid action Solution for Post-Calving Problems

A formulation to combat all Disorders

- Calcium chloride – Provides Ionic Calcium and available in blood within minutes (higher than calcium injectables)
- Magnesium chloride – Strengthens muscles and tissues, enhances their activity preventing lethargicity
- Potassium Iodide – Ionic balance within body and stimulates Thyroxine hormone function by activating Thyroid through Iodine
- Silymarin – Hepatoprotective controls degeneration and initiates regeneration of Liver cells for better metabolism and activate for optimum function.
- Methyl cobalamin – Strengthens nervous system as a nervine tonic. Normalises metabolism. It is essential for energy conversion from fat and protein.
- Honey – It acts as antioxidant natural way. It kills free radicals and boosts up immunity system. It provides energy to animal and serves antistress factor.
- Glucose – It provides directly energy to animal to prevent ketone formation or becoming lethargic or lowering milk production

Cures and Prevents Specific Peri-parturient Disorders

- Oral Energy Booster
- Rapidly bioavailable calcium
- Packed with essential nutrients
- Fortified with Antioxidant, Hepatoprotectant

Right combination

Right proportion

Right nutrients

Recommended by

Veterinary Nutritionists

A formulation to Replenish and Compensate

Calcium and Nutrients

Ionic Gel 300 g

Necessary at Pre-calving and Post-calving Bovines

Product by

Wellvet Life sciences (p) Limited

Hypocalcaemia First Time – One Solution To Calving Stress Postparturient Problems
Rapid Acting Calcium

Ionic Gel 300 g

A boon to provide and compensate calcium

When

- Reduced calcium blood levels
- Onset of milk fever or hypocalcaemia
- Formation of ketone bodies
- Predisposing prolapse, retention of placenta
- Stress initiation
- Lethargicity weakness
- Low or no colostrum
- Reduced muscular activity
- Hampered metabolism
- Nutrient Deficiency Syndromes
- Poor milk production

Leads to

Intermittent lower milk yield – Shorter Lactations

Loss – Loss – Loss <====> Economical – Production – Reproduction

Solution One for All – Ionic Gel

Benefits

- Immediate availability of Ionic Calcium
- Does not need digestion, absorption process
- Prevents milk fever
- Controls ketosis
- Good quantity of colostrum for calf
- Balances hormonal secretions
- Rejuvenates with energy
- Prevents Negative Energy Balance
- Compensates essential nutrients
- Better metabolism with hepatoprotectant
- Combats post parturient stress
- No chance of prolapse or ROP
- Strengthens muscular activity
- Antioxidant benefits

Animal becomes Smart Active Productive

Composition

Calcium chloride	70 g
Magnesium chloride	1 g
Potassium Iodide	1 g
Methyl cobalamine	400 mcg
Silimarine	400 mcg
Honey	5 g
Glucose	50 g

Administration
Oral to Drench

IONIC GEL

Dose
One bottle a few hours before and one bottle after calving.
For high yielding dams continue to drench 2 packs for 3 days

Presentation
300 ml polypack
